PERSONAL SUMMARY

I am a home-based Front-end developer proficient in HTML, CSS, JavaScript and a deep knowledge of React, Sass, D3 and Bootstrap. I also use Linux, Apache, Git, Node.js, Express.js and MongoDB.
I have experience building from one-page websites to e-commerce ready websites that look great in all browsers.

Juan is always learning and coding and is looking to become an important member of a software and web design company. He is highly motivated and is ready to take today´s most difficult challenges web companies have to face.
